INSULATION REMOVAL VACUUMS

VERSA-VAC 11

POWERFUL INSULATION REMOVAL

A Powerful Choice For Insulation Removal

Want to make short work of messy, time-consuming insulation removal jobs? The Versa-Vac 11 insulation removal vacuum is designed for fast, profitable removal of fire, smoke and water damaged insulation from attics, sidewalls and crawl spaces.

With this high performance unit on the job, you'll handle bulky materials with ease. Blown-in insulation and plaster chips – wet or dry - are removed quickly and efficiently. Material intended for recycling can be conveyed directly to your spraying machine for reuse. Waste material can be discharged directly into 75 cubic foot disposable collection bags or directly into a Dumpster® receptacle.

Take Advantage Of This Growing Market

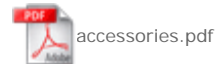

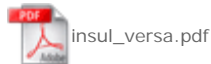

Need help making your decision? We are uniquely qualified to help you profit from the growing demand for insulation removal services. Whether you're an experienced contractor expanding your service offerings or an entrepreneur looking to start a business with great growth potential, we have all the equipment and accessories you need.

Versa-Vac 11 Features And Advantages

- Heavy-gauge, welded steel construction.
- Textured, powder-coated for long-term protection.
- Heavy-duty, material-handling fan wheel for years of dependable operation.
- 6" inlet & outlet for productivity.
- Superb handling of web or dry materials.
- Reduces labor time and increases profitability.
- One-Year warranty.
