## INSULATION BLOWING MACHINES – SERIES 1400

### Insulation Blower - SERIES 1400 - The Industry's Fastest High-Volume Blower

For open blow production Meyer's top of the line all-fiber, large capacity SERIES 1400 delivers unmatched performance and unparalleled accuracy.

Want to do more jobs per day or complete big jobs faster? The SERIES 1400 solves your production challenges by integrating:

- An oversized hopper
- Generous 5 bag holding capacity
- The industry's largest available blower
- 4" diameter hose size

### Quick-Change Seal Strip System - Simplified Operation - Minimized Downtime

Smart engineering simplifies operation, minimizes downtime and delivers accurate and uniform coverage. Meyer's exclusive quick-change seal strip system lets you replace seal strips in the feeder in minutes. A 4-speed transmission provides flexible hopper speed control, and the electrically operated material slide gate is panel mounted for easy adjustment. All gauges and controls are easily accessible without having to remove protective safety guards.

Insulation blowing professionals can choose from a complete range of drive options to suit

specific needs and preferences including:

- Mechanical power-take-off
- Water cooled gas or diesel engines

The SERIES 1400 represents Meyer's total commitment to the highest standards of quality, craftsmanship and customer service. Backed by the most comprehensive 2-year warranty in the industry, the SERIES 1400 will serve the professional insulation applicator for years.

## PRODUCT SPECIFICATIONS

	1403	1405	1405A	1406
<b>Power Source</b>	Mechanical Power-Take-Off	3 Cylinder, Water Cooled Gas Engine	2 Cylinder, Water Cooled Gas Engine	3 Cylinder, Water Cooled Diesel Engine
<b>Length</b>	86"	86"	86"	86"
<b>Width</b>	49"	49"	49"	49"
<b>Height</b>	72"	72"	72"	72"
<b>Weight</b>	1600 lbs.	1900 lbs.	1850 lbs.	1950 lbs.

## Features & Advantages

**Weight loaded pressure relief valve**

**Maintenance free agitator arm/pad assembly**

**Welded 4" structural I-Beam base**

**High precision, robotically welded components**

**Laser cut, CNC punched heavy gauge steel plate**

**Severe service drive train**

**Large diameter, high grade shafting**

**200' 3-way remote control cord (available with optional radio remote)**

**Stainless steel hinges and fasteners**

**Powder coated finish**

**Precision machined rotary airlock feeder**

**Lubricated-for-life bearings**

**Automatic back pressure check valve**

**Heavy duty chains and sprockets**

**Shear pin torque protection**

**Fully guarded drive/power train**

**Low oil shut-off (engine drive models)**
